

# Let's talk about Mental Health

**Dr Mike Simpson**

RSE, Newcastle University

2025 SSI Fellow

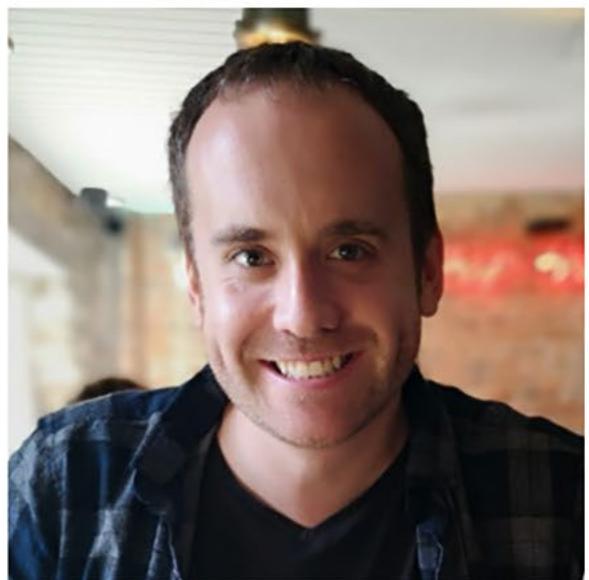

# Trigger Warning

*This talk includes discussions of mental health issues and statistics, including brief mentions of anxiety attacks and suicide.*

My Story

## Mike Simpson

Professional nerd, father, photographer, gamer, aspiring writer, sci-fi addict and code monkey.

## I Am Your Father – Part 1: The Secret

04/10/2019 | I Am Your Father

October 4, 2019

So, as I am sitting down to write this, my wife and I are just about to announce to our family and friends that we are expecting our first child.

[Pauses for applause and cooing noises]

Interesting times! I'm still not sure it feels real yet...

Anyway, there's quite a lot of information and advice out there, most of which is – quite rightly – aimed at expectant mothers. However, there doesn't seem to be as much stuff intended for fathers-to-be, so I thought I'd throw my digital ink into the mix. I'm going to be chronicling this adventure and trying to talk about what it is like to be a nerdy millennial on the road to fatherhood.

The plan with this blog series is to talk about our experience and to share any useful bits of information that I pick up along the way. This will be aimed mainly at new fathers but will include stuff we both learned that we didn't know before and which might be useful if you are thinking about having a child of your own.

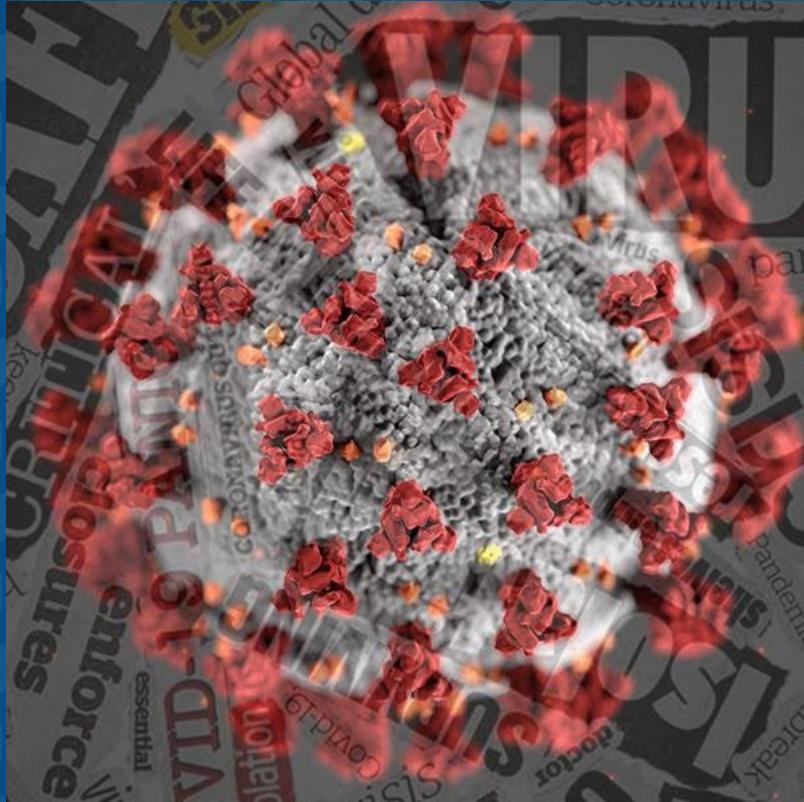

I'm going to try and be brutally honest about it, as much as possible, but I have also given my wife power of veto over any information that I share. And yes, she will have read this before I post it!

### The Story So Far

So, it is currently Week 12 (everything in our life is going to be measured in weeks for the foreseeable future) and we'll be having our scan soon. At this point, other than the fact that the baby is already the size of a lime, there is

# Mounting Pressures

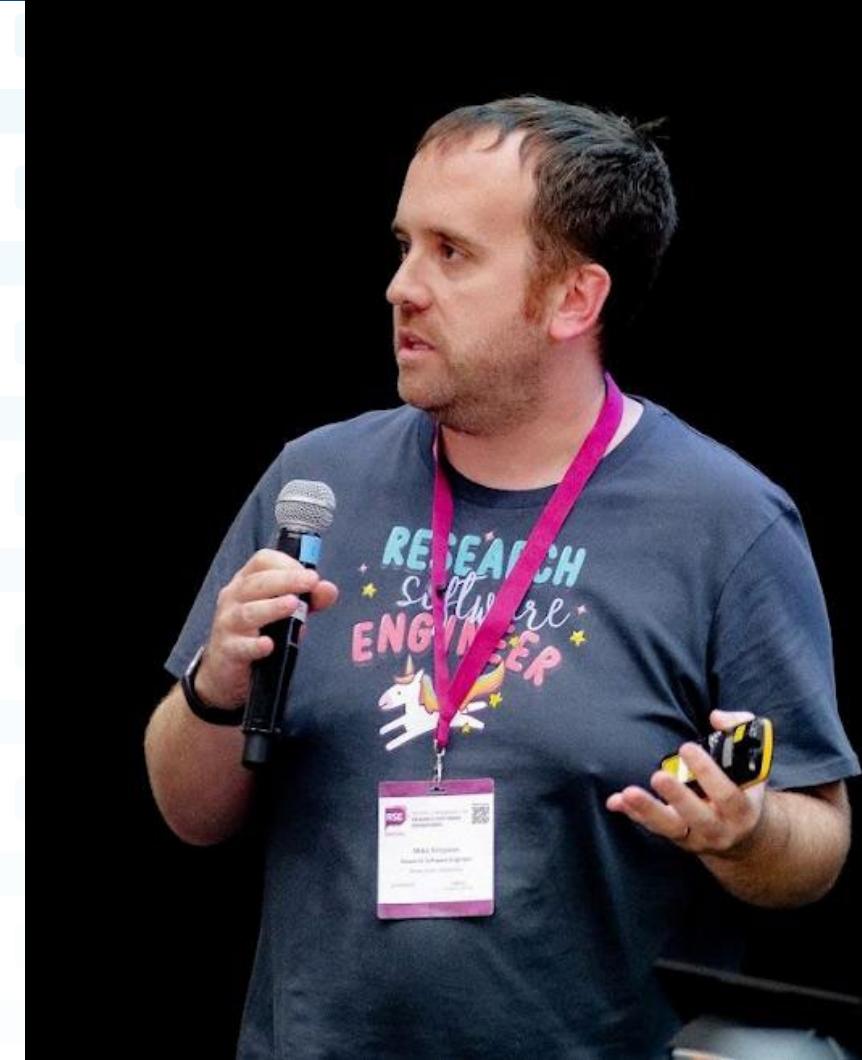

# So, why am I talking about it?

A lot of what happened was out of my control (or anyone else's).

But there are things we can learn from my experience – and the experiences of others.

That was why I applied for an SSI fellowship.

# The Software Sustainability Institute

Founded in 2010.

## Mission:

Helping people build better and more sustainable software to enable world-class research.

Next round of Fellowships: **August 2025.**

A photograph showing two hands holding white ceramic mugs with blue rims. Each mug contains a latte with intricate white foam art. One hand is light-skinned and the other is dark-skinned, with a gold ring on the ring finger. They are resting on a light-colored wooden surface.

Supporting Mental Health

# Mental Health in the UK

**1 in 4** adults will experience a mental health problem each year in England.

- [\[Mind\]](#)

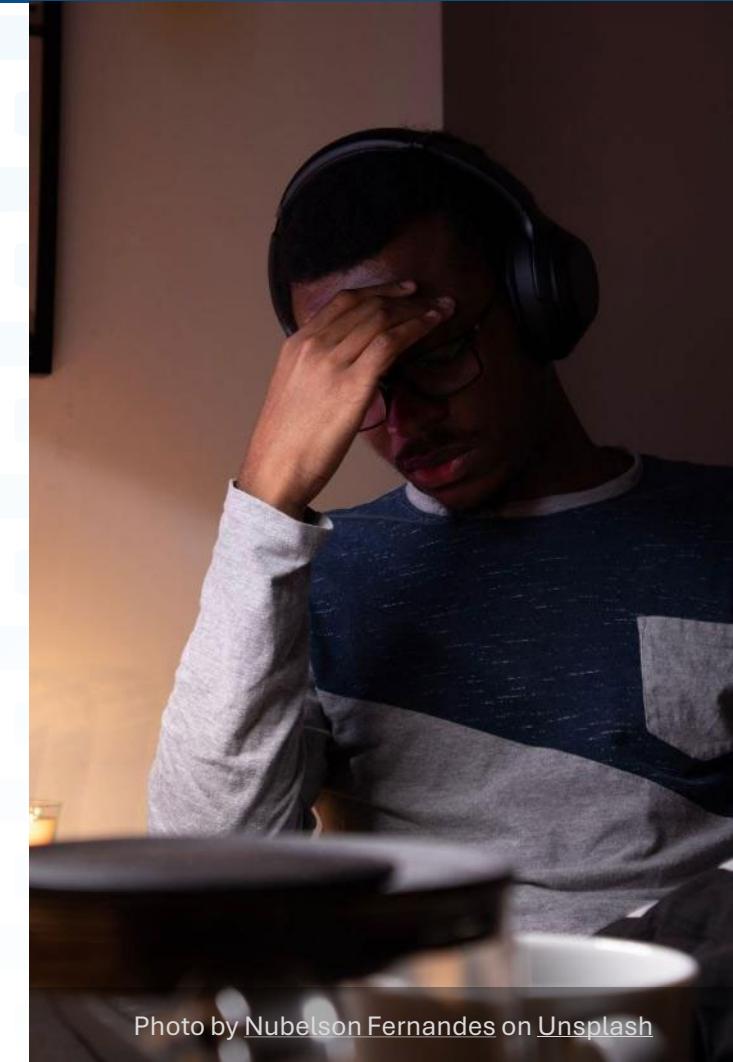

Photo by Nubelson Fernandes on Unsplash

# Mental Health in the UK

Some statistics:

- People who identify as **LGBTQ+** are **2-3 times more likely** to report a mental health problem than heterosexual people [[Mind](#)]
- **23% of Black British people** will experience a mental health problem compared to **17% of White British people** [[Mind](#)]
- Men are **3 times more likely** to take their own lives than women [[Mind](#)]

# Mental Health in the Research Software Community

**2022**

- Dave Horsfall becomes SSI Fellow.
- Conducts a survey into Mental Health in the Community.

I've been helping analyse the results.

We hope to publish soon! Here's a preview...

# Mental Health in the Research Software Community

Is it any wonder that of 135 people:

- 52% reported mental health problems.

Specifically:

- 32% experienced Anxiety.
- 30% experienced Stress.
- 22% experienced Burnout.
- 17% experienced Depression.

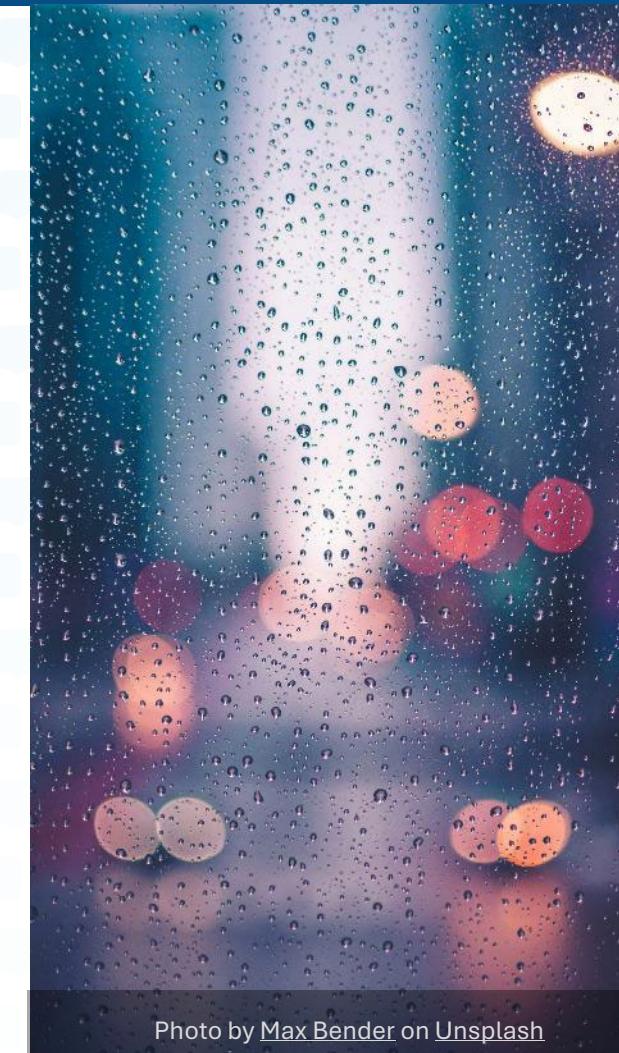

Photo by Max Bender on [Unsplash](#)

# Mental Health in the Research Software Community

## Sources of Stress and Anxiety

1. Context Shifting
2. Deadlines
3. Activities outside your Comfort Zone
4. Difficult Partners
5. Life/work balance
6. Lack of recognition

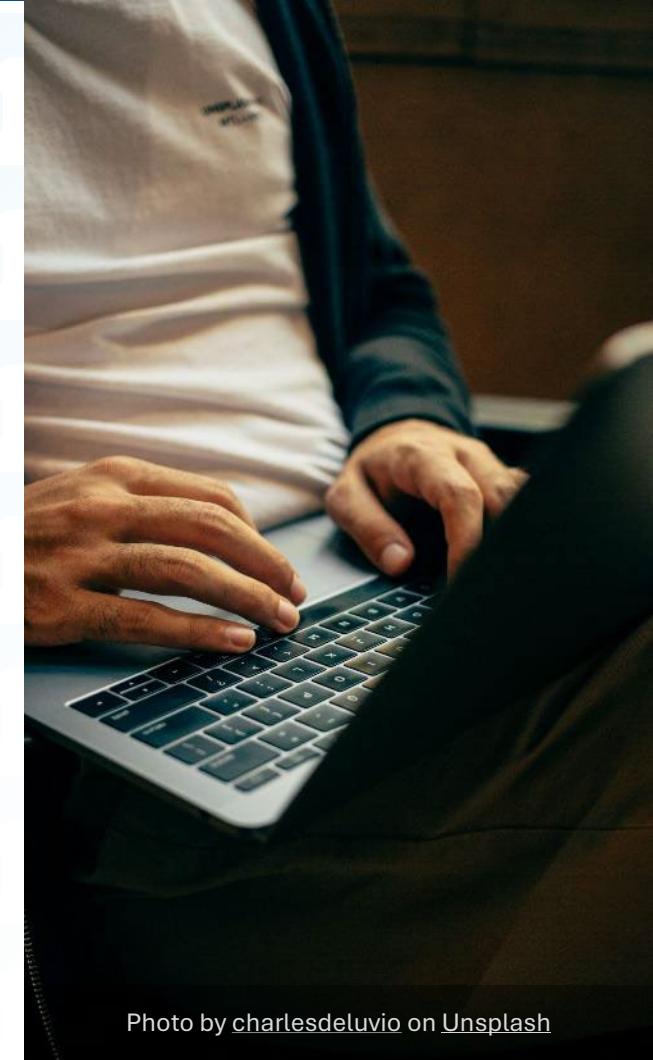

# Mental Health in the Research Software Community

Sources of negative feelings:

1. Feeling you're not up to the job
2. Lack of control over workload
3. Feeling like you don't fit in

33 (10.8%) considered leaving their current job

26 (8.5%) considered leaving the profession

If we want to make Research Software  
more sustainable, we have to help sustain  
the **people** writing the software, too!

# What can we do?

I can't make your boss give you...

- More money
- Less work
- The promotion you deserve

So, what can we do?

# Continue the Conversation

We need to:

- Smash the Stigma
- Create an environment where people feel able to discuss issues.
- Address issues before they become problems

**Mike Simpson**  
@mdsimpson.co.uk

We're not "over-diagnosing", we're getting BETTER at diagnosing. That was the point of all those years of research.

And yes, more people are self-diagnosing, but that's because they are better informed. That was the whole point of raising awareness!  
**#MentalHealth**

19 March 2025 at 08:29 Everybody can reply

**It's better to raise a RED FLAG before  
you are forced to wave a WHITE one.**

# Continue the Conversation

It can be difficult to talk to colleagues or your line manager.

It could be perceived as a sign of weakness.

I am not weak! I am resilient,  
**because** of my previous experiences.

# The Cost of Absence

If I was off for six weeks

- 30 days
- £12,480

Photo by Rachel McDermott on [Unsplash](#)

# The Cost of Absence

If I was off for six weeks

- 30 days
- £12,480

Mental Health First Aid

- £325 (+ 2 days)
- £1,155

Photo by Rachel McDermott on [Unsplash](#)

# The Cost of Absence

Poor mental health is responsible for  
**72 million working days** lost and costs UK  
employers **£45 billion each year.**

- [ [MHFA England](#) ]

What can we practically do?

# Stress Container

# How Writing saved my Life

If thoughts are spiralling...

Writing is:

- a way to process things
- A way to get it “out of your head and onto the page”

How Writing Saved My Life

"Writing about my experiences enabled me to process what I'd been going through and allowed me to finally recover after years of struggling with depression, anxiety and insomnia."

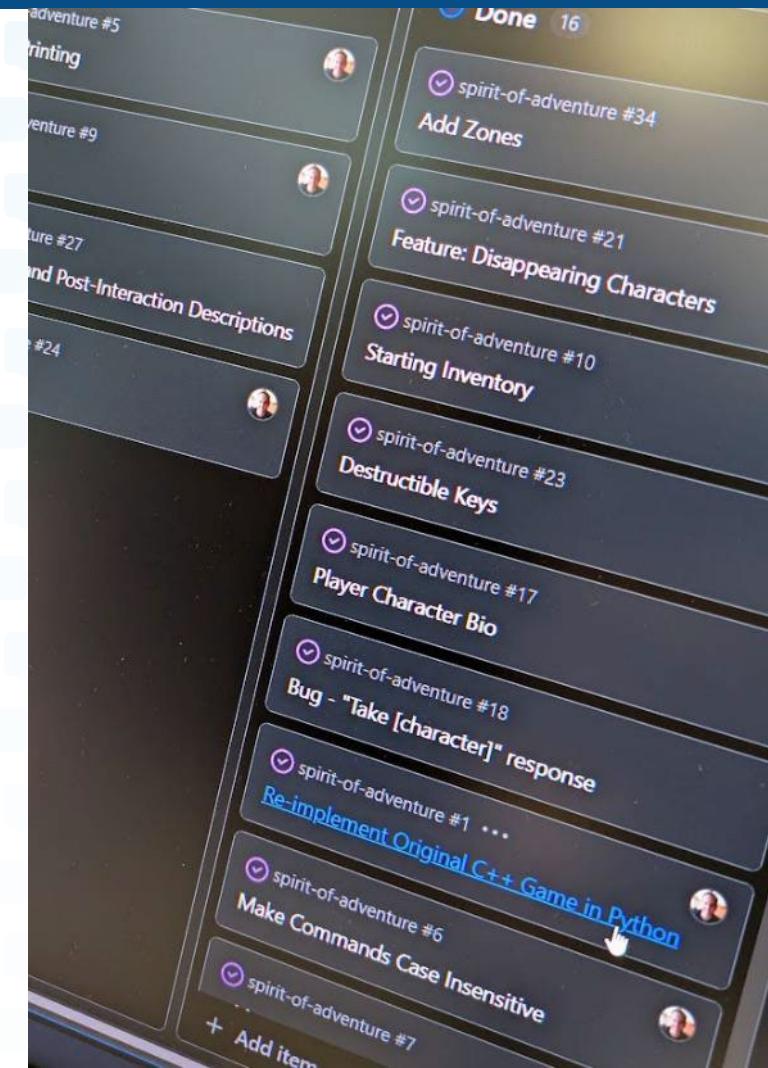

The  
*Journey*

by M. D. Simpson

# Reflect on your Progress

Feel like you haven't been “productive enough”?

- Don’t just close issues
- Take time to reflect
  - What went right?
  - What went wrong?
  - **Why** did it take longer than expected?
  - What did you learn?

# Practical Advice?

But what works for me probably won't work for you...

- There is no one magic bullet.
- Everyone is different.

So... what's the solution?

# CW24

## 2024 SSI Collaborations Workshop

### Question:

What can we practically,  
realistically do to help improve  
mental health in the research  
software community?

# Handling the Workload

Many of us struggle to manage our workloads and maintain a healthy life/work balance.

Lots of tools and frameworks exist.

- Often used by managers to increase productivity.

Could they help US?

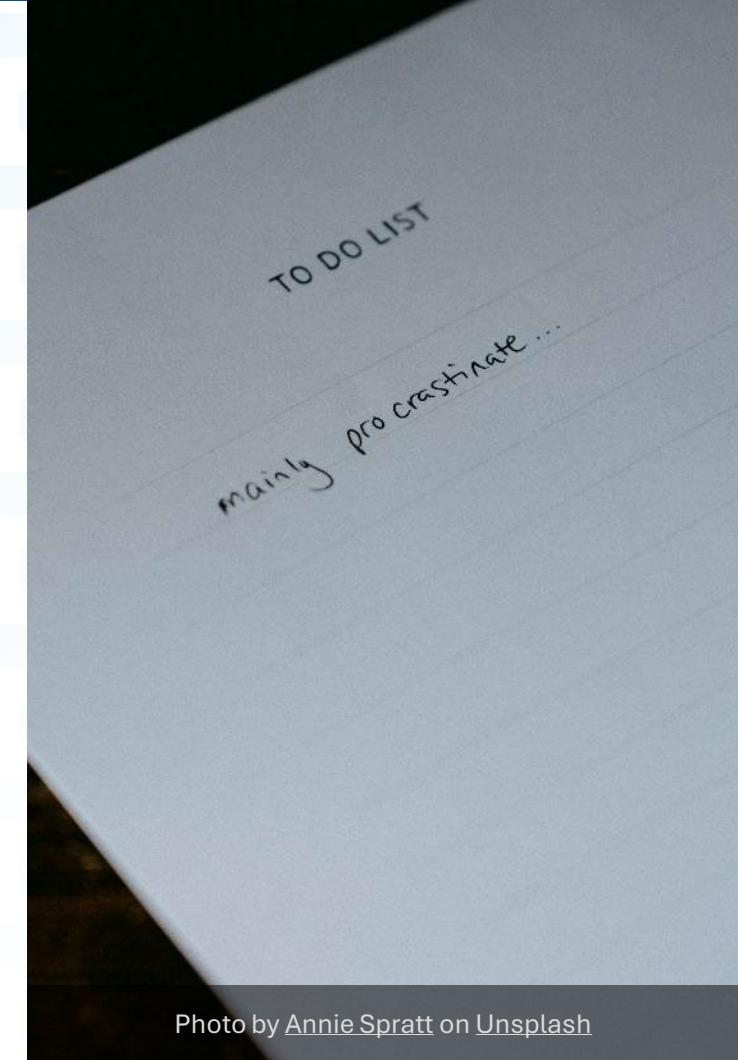

Photo by Annie Spratt on Unsplash

# Task Management for Humans as Self-Care

- Carpentries-style resource.
- Introduce task-management ideas.
- Refocus away from value for your employer.
- It's about value for you!
  - Feel like you've been productive.
  - Silencing The Voices.

# Why is it important?

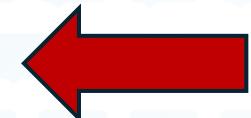

## **“Task Management for Humans as Self-Care”**

- Wins one of the top prizes during the Ideas Session on Day 2.
- Goes on to win 1st Prize for the Hack Day on Day 3.

Because mental health is important!

# The ConveRSE 2025 Tour

- CW25, *Stirling, May*
- UKCEH, *Lancaster, June*
- WHPC Workshop, *Durham, June*
- DCC Coding Session, *Netherlands, June*
- N8CIR RSE Meetup, *York, July*
- RSECon25, *Warwick, September*
- RSAA, *Online, September*
- Alan Turing Institute, *London, September*

THE ROAD SO FAR

# Common Questions

- How to deal with Impostor Syndrome?
- What can I do for my team?
- Where can I go to get help?

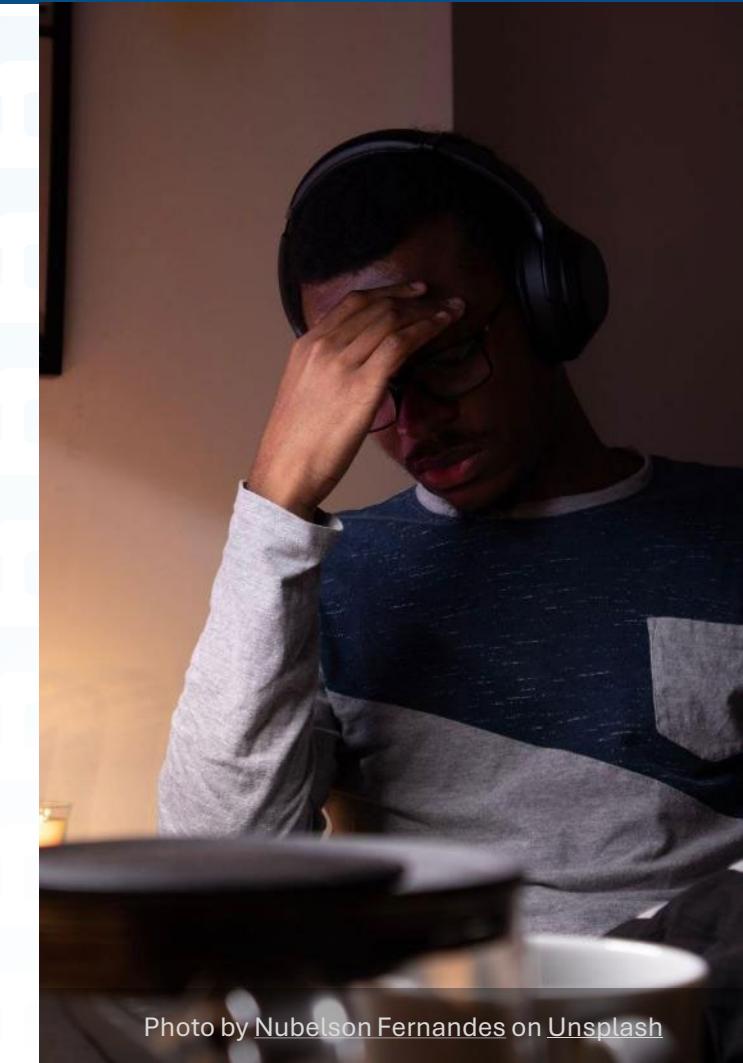

Photo by Nubelson Fernandes on Unsplash

# If you are struggling...

Talk to:

- Your Line Manager
- Mental Health First Aiders
- Employee Assistance Programme or Occupational Health
- Your GP
- And/or a therapist

Photo by Rachel McDermott on [Unsplash](#)

# ConveRSE

We have launched 'ConveRSE':

- An online hub for mental health information, resources and support
- Aimed primarily at RSEs and RTPs (hopefully applicable to PhD students and others in similar professions)
- Continuing the conversation

## Welcome

Hello and welcome to the ConveRSE website!

The aim of ConveRSE is to continue the conversation around mental health in the Research Software Community. Looking after your mental health is important, and we want to help you do that, but our main mission is to emphasise how important it is for people to talk about mental health in the workplace, so they can get support and address issues *before* they grow into larger problems.

This site is intended to be a hub for information, resources and blog posts about mental health, aimed at - but not exclusively for - Research Software Engineers (RSEs) and Research Technical Professionals (RTPs).

## Supporting Mental Health in the Research Software Community

Mental health problems can affect us all. 1 in 4 people in England experience a mental health problem each year [Mind]. Lots of things can impact our mental health, but RSEs and other technical professionals working in academia face a unique set of challenges.

We are a relatively new profession, with limited recognition and career development options. We often work alone, and have to do a lot of context and technology switching. We work with researchers who are world leaders in fields we know nothing about, which can lead to imposter syndrome. Left unchecked, we are at risk of a range of mental health problems, such as burnout, depression and anxiety.

"If we want to make research software more sustainable,  
we have to help sustain the people writing the software too!"

# ConveRSE

## Including:

- Results from Dave Horsfall's survey
- Tips and advice for looking after
  - Yourself
  - Your colleagues
  - Your teams
- Links to additional information and resources
